

MR2561-139
Appln. No. 10/753,468
Reply to Office Action dated 9/28/2005

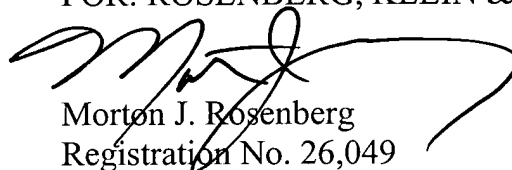

Remarks/Arguments

This case has been reviewed and analyzed in view of the Official Action dated 28 September 2005. In the Official Action, the Examiner has found three inventions, namely, Species I directed to Figure 1 drawn to an anti-resonant structure with an elastic section formed in an arched shape; Species II directed to Figure 2 drawn to an anti-resonant structure with an elastic section formed in an undulate shape; and Species III directed to Figure 3 drawn to an anti-resonant structure with an elastic section with at least one bent section. The Examiner has required that Applicant chose one Species for further prosecution in this case.

By this Response, Applicant elects Species I directed to Figure 1.
Additionally, Applicant believes that Claims 1-5 read on Species I.

It is now believed that the subject patent application has been placed in condition for examination and such action is respectfully requested.

Respectfully submitted,
FOR: ROSENBERG, KLEIN & LEE
